NOT RECD

Sir:

In response to the Final Office Action dated November 27, 1996, please amend the
above-identified application as follows:

IN THE CLAIMS

Please AMEND the claims as follows:

1. (Thrice Amended) A method of compression for transmission of encoded digital video
signals having a variable number of data bits per image frame, comprising the steps of:

- a) detecting a first bit rate of an encoded digital video signal bit stream;
- b) sequentially writing the encoded digital video signal bit stream into a buffer at the
first bit rate;
- c) deriving a second bit rate as a percentage of the first bit rate, which percentage
changes inversely in relation to changes in the first bit rate; and
- d) reading the encoded digital video signal bit stream out of the buffer at the second
